

Solve using Properties of Multiplication

Fill in the missing numbers using properties of multiplication.

1. $9 \times 11 = 9 \times (10 + \square) = (9 \times \square) + (9 \times 1) = \square$

2. $3 \times 33 = 3 \times (\square + 3) = (3 \times 30) + (3 \times \square) = \square$

3. $7 \times 14 = 7 \times (10 + \square) = (7 \times \square) + (7 \times 4) = \square$

4. $6 \times 16 = 6 \times (10 + \square) = (6 \times \square) + (6 \times 6) = \square$

5. $4 \times 23 = 4 \times (20 + \square) = (4 \times \square) + (4 \times 3) = \square$

6. $5 \times 13 = 5 \times (10 + \square) = (5 \times \square) + (5 \times 3) = \square$

7. $2 \times 24 = 2 \times (20 + \square) = (2 \times \square) + (2 \times 4) = \square$

8. $8 \times 12 = 8 \times (10 + \square) = (8 \times \square) + (8 \times 2) = \square$

9. $5 \times 16 = 5 \times (10 + \square) = (5 \times \square) + (5 \times 6) = \square$

10. $6 \times 13 = 6 \times (\square + 3) = (6 \times \square) + (6 \times 3) = \square$

Solve using properties of multiplication:

11. $16 \times 6 =$

12. $36 \times 2 =$

13. $11 \times 7 =$

14. $19 \times 5 =$

15. $12 \times 8 =$
